PROFESSIONAL PROFILE

Full Stack Developer experienced in building production backends with NestJS and TypeScript, including REST and GraphQL APIs, PostgreSQL, and microservices architectures. Since 2024, independently developed and maintained Urbano Sport Center in production, a sports management platform covering tournaments, court bookings, online payments, academies, live streaming, and real-time IoT scoreboards. In financial services, contributed to the migration of a legacy core from PHP 5 to PHP 8, developed new modules, worked with Informix, and provided technical guidance and code reviews. Also experienced with Java (Spring Boot), Python (Django, FastAPI), React, Next.js, Docker, Git, CI/CD, and VPS/cloud deployments.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Urbano Sport Center 2024 - Jul 2026

Occasional - Maintenance | Remote

- Designed and developed an end-to-end sports management platform covering tournaments, court bookings, online payments, academies, courses, live streaming, and real-time IoT scoreboards.
- Built the backend with NestJS and TypeScript, exposing GraphQL and REST APIs over PostgreSQL, with a mobile-facing PWA for bookings, tournament registration, payments, and notifications.
- Owned architecture, development, deployment, and production maintenance. Platform has been active since 2024.

Programmer Analyst | Cooperativa de Ahorro y Crédito Andina Ltda. Feb - Aug 2026

Full-time | Latacunga, Ecuador

- Contributed to the migration of the financial core from PHP 5 to PHP 8 across backend, frontend, and QA for existing modules.
- Developed new modules and functionalities for the cooperative financial system and worked with Informix databases and queries for financial processes.
- Provided technical guidance to teammates, reviewed shared code, and implemented modern user interfaces for internal users.

Full Stack Developer | Unidad Educativa Blaise Pascal Aug - Oct 2025

Full-time | Remote

- Analyzed, designed, developed, and tested an institutional academic management system using Laravel and Docker.
- Designed the PostgreSQL relational database and implemented grades, attendance, reports, and role-based access modules.
- Deployed the system to a VPS production environment and provided end-user training and post-implementation support.

IT Support Intern | Ministry of Finance - IT Area 2-month internship

Public-sector entity

- Provided technical support to users and performed preventive and corrective maintenance of computer equipment.

EDUCATION

Software Engineering, Universidad de las Fuerzas Armadas ESPE 2020 - 2026

Technical High School Diploma in IT Graduated 2019

SELECTED PROJECTS

Urbano Sport Center - Production sports operations platform 2024 - Jul 2026

- Tournaments, court reservations, online payments, academies, live streaming, and real-time IoT scoreboards.
- End-to-end architecture, deployment, and production maintenance.

Stack: NestJS, TypeScript, GraphQL, REST, PostgreSQL, PWA

<https://urbanosportcenter.com>

EduMonitor AI - Classroom attention monitoring platform 2026 - Present

- Emotion and pose recognition with real-time participation metrics and role-specific dashboards for administrators, teachers, and students.

Stack: Django, Python, Face-API.js, Tailwind CSS, SQLite

<https://allett29.pythonanywhere.com/>

ADDITIONAL PROJECTS

- Institutional Academic Management System** - Student, faculty, and administration management 2025
- Grades, attendance, reports, role-based access control, PostgreSQL data model, Docker deployment, and user training.
- Stack:** Laravel, PostgreSQL, Docker, VPS
- AnalytiCore** - Cloud microservices prototype for text analytics 2025
- Sentiment analysis and keyword extraction using a React frontend, FastAPI orchestration, and a Spring Boot analysis worker.
- Stack:** React, FastAPI, Spring Boot, PostgreSQL, Docker

TECHNICAL SKILLS

Backend	NestJS, TypeScript, Node.js, Laravel, Django, FastAPI, Spring Boot, PHP 8, REST, GraphQL, Microservices
Frontend / Web	React, Next.js, TypeScript, Tailwind CSS, PWA, Flutter, GraphQL Client
Languages	TypeScript, JavaScript, Python, Java, PHP, Dart, SQL
Databases	PostgreSQL, MySQL, SQL Server, MongoDB, Informix, SQLite
AI & Automation	Generative AI, LLM integration, Computer Vision, Machine Learning, Model Training, n8n, Face-API.js, Prompt Engineering
DevOps & Quality	Docker, CI/CD, Git, GitHub Actions, VPS, Render, Scrum, Cybersecurity Fundamentals

CERTIFICATIONS & PROFESSIONAL TRAINING

- Fundamentals of Cybersecurity, Data Science and Machine Learning Applied to Cybersecurity - Universidad de las Fuerzas Armadas ESPE.
- Training areas: Full-stack development, Clean Architecture, Generative AI, AI training, Machine Learning, Computer Vision, n8n automation, CI/CD, Scrum, and secure coding.
